TITLE : DISPOSABLE DIAPER

ABSTRACT : PROBLEM TO BE SOLVED: To provide a disposable diaper which has good appearance upon wearing and is excellent in fitting performance and convenient for wearing.

SOLUTION: This disposable diaper is equipped with a liquid permeable surface sheet 2, a liquid impermeable backside sheet 3, and a liquid retainable absorptive body 4 sandwiched therebetween. The diaper is partitioned into a belly side part A positioned to the belly side of a wearer upon wearing and a back side part B positioned to the back side. The absorptive body 4 is partitioned into a front part positioned to the belly side part A and a rear part positioned to the back side part B. The end edge of the rear part is positioned so as to be positioned upper than the buttocks of the wearer upon wearing. A notch part 10 is equipped in the longitudinal direction of the absorptive body to the end edge and almost on the center in the lateral direction of the absorptive body, but is not equipped on the front part.
